This is what I got from Susan this morning. Just called her, she didn't answer.

Thanks, Erin. Yes, our people are on it. It is unrelated to the ethanol shut down. This is from their digesters that hold thin stillage. We think they are going to have to route the spillage to their lagoons, but there isn't really an alternative. It is also bitterly cold outside, so I don't know if the discharge materials will freeze or not. -2, -24 wind chill.

Thanks,
Susan

Hi Susan, we got a spill report this morning regarding a burst pipe and release of manure and stillage at the AltEn facility. Our spill line folks said NDEE is following up, you are probably already aware but I'm hoping to err on side of over-coordination.

Thanks,
Erin
